

HOP GUN TMCI PADOVAN from 2021

Model Dry-hop 400

Volume of tank : 400 liters

Up to 30 Kg of hop pellets

Including centrifugal pump and flow-meter

HOP GUN TMCI PADOVAN from 2019

Model Dry-hop 200

Volume of tank : 200 liters

Up to 20 Kg of hop pellets

Including centrifugal pump and flow-meter

Centrifuge (20 to 50 hl / hour)

ALFA LAVAL Beer centrifuge

Type VNPX 407 SGP 34

Machine from 1994

Capacity with beer : 20 hl up to 50 hl / hour

SARTORIUS filter placed after the centrifuge

SIDEL - KRONES - KHS - PET - blow - moulder - syrup - room

Centrifuge from SPX

Type SE161HBIV-Q3P2

- Skid
- Feeding pump
- Pneumatic metering device
- Sludge pump
- Output turbidity meter
- Inlet filter

Machine from 2016 fully overhauled by the manufacturer

Capacity with green beer : 70 hl / hour

Flash pasteurizer 10.000

liters / hour

Recent electrical cabinet

- APV plate heat exchanger
 - Tubular warmer
 - 1 beer chiller (Alfa-laval)
 - 1 beer warmer (for bottle re-fermentation)
 - Direct steam feeding with condensate recovery unit
 - 1 beer pump
 - 2 coupling lanterns
-

KIESELGUHR FILTER

FILTRON type NOVON 80/120

28 chambers – Filtration surface : 46 m²

Capacity from 100 to 150 hl/h depending on the type of beer

Kieselguhr preparation tank + dosing pumps

Schenk Niro sterile filters (550 hl / hr)

Sterile filter from Schenk

Type Niro 1000 / 250

Capacity with beer : 550 hl / hour

2 filters available
