

Brewhouse (11,7 hl) with fermentation vessels

Product Short Description :

BREWHOUSE (1,170 LITRES PER BREW) – Electrical heated

- Wooden clad Stainless Steel Hot liquor tank (2 x 12 KWh 3-Phase electric heating elements)
- Temperature control panel for HLT.
- Hot liquor supply pump (240V)
- Wooden/Stainless Steel Grist hopper/grist hydrator
- Wooden clad Stainless Steel mash tun/removable plates/removable lids
- Stainless Steel Underback
- Transfer pump (240V)
- Stainless Steel Copper (3 x 18 3-Phase KWh electric heating elements)
- Hop filter
- Digital Temperature Display
- Wort pump (240V)
- Plate heat exchanger (10-12 brls/hr)
- Electrical control panel

FERMENTATION TANKS (atmospheric pressure)

- 3 x Wooden clad Stainless Steel closed (with top opening and front man hole) FVs with cooling panels
- 3 x remote cooling units
- 2 x stainless steel conical fermentation tanks 60° angle, with refrigerated sleeves 15HL.

Manufactured 2015
